

WATCH THE WOVES

gorillavision
Available exclusively in Europe from TP1

gorillavision

Love every leap, watch every wow

Trigger

Record

Replay

These days an amazing in-park experience just isn't enough. Your customers want to capture and relive every leap, flip, somersault and spin too – usually the second their feet hit the ground. And for every video viewed, liked and shared on their social feeds, your park enjoys invaluable viral exposure to an avid new audience.

Exclusive, fully-integrated live capture cameras, screens and RFID wristband technology from gorillavision allows you to revolutionise customer experience, create new profit streams and fuel your social media feeds.

gorillavision technology triggers 'me-time' recording in any one of your in-park 'wow' zones, ensuring every brilliant trick and each epic fail is saved and ready to stream – in-park, at home or on the go.
